

BCL2L1

Domain annotation matrix · comparable representative-domain instances

Which comparable domain instance is detected in which species, and where is the annotation still pending?

	CDG1 Bcl2 BH4	CDG2 Bcl-2 BH1-3
<i>Homo sapiens</i>	1–27	90–188
<i>Mus musculus</i>	1–27	90–188

 detected

CDG1 = Bcl2 BH4 · CDG2 = Bcl-2 BH1-3

Cell text is the native amino-acid interval of the detected instance. ?Not detected? means no representative annotation in this run, not biological absence.
