

BCL2L1 — exploratory candidate ranking

Mus musculus · NP_001276668.1 · 3 exploratory candidate region(s) · amino-acid intervals on the primary protein · ranked by evidence score

Which isoform-difference regions carry the most transparent support? Exploratory candidate regions only — Biological validation: not validated. The evidence score summarises isoform support, exon-boundary agreement, alignment support and domain context; a score is a measure of support, not a validation.

Rank	Candidate	Interval (aa)	Length (aa)	Affected isoforms	Supporting comparisons	Evidence score	Evidence strength	Biological validation
1	C1	189–221	33	9 of 9	16	75	high	not validated
2	C4	227–235	9	9 of 9	16	70	high	not validated
3	C1	191–191	1	9 of 9	8	45	medium	not validated
